

AMENDMENT NO. 29 TO THE NASA RESEARCH ANNOUNCEMENT (NRA) ENTITLED
"RESEARCH OPPORTUNITIES IN SPACE AND EARTH SCIENCES (ROSES) 2005,"
NNH05ZDA001N, RELEASED JANUARY 28, 2005

Amendment No. 29 to NASA Research Announcement "Research Opportunities in Space and Earth Sciences" (NNH05ZDA001N) establishes a new program element in Appendix A.30 entitled "Living With a Star Targeted Research and Technology: NASA/NSF Partnership for Collaborative Space Weather Modeling." This new program element solicits proposals in support of the National Space Weather Program goal to achieve timely, accurate, and reliable space environment observations, specifications, and forecasts. In addition to basic research, this proposal competition has emphasized the development of space weather models for specification and forecast of conditions throughout the space environment. Notices of Intent to propose are due October 14, 2005, and proposals are due December 2, 2005.

Further information about this program element is available from Dr. Madhulika Guhathakurta, Earth-Sun System Division, Science Mission Directorate, National Aeronautics and Space Administration, Washington, DC 20546-0001; Telephone: (202) 358-1992; E-mail: Madhulika.Guhathakurta@nasa.gov.
